

Project idea

Skin care – E-commerce

The project is a full-stack web application that allows users to browse and purchase skincare products online. The frontend provides a responsive and user-friendly shopping interface, while the backend handles product data, user accounts, and order processing through a secure database.

Team Members

1-Lenah Mahmoud (leader)

2-Shahd Yehya

3-Joy Akram

4-Elaria Ezzat

5-Maurien Yousry

6-Sara Yasser

Project plan

month	Period	What to do
September	2 weeks	Html +css +bootstrap
September	2 weeks	React
October	1 week	front-end side
October	3 weeks	Back-end course
November	4 weeks	back-end side
December	4 weeks	Project accomplished +Final revision +last edits

Team members' roles

In our project, each team member will be responsible for both the client-side (frontend) and the server-side (backend) of a specific page. Since the project contains around 6 pages, every member will fully handle one page, ensuring it is complete and functional.
